

Cosmetic Packaging

Cosmetic packaging is available in various range including cream jars, shampoo bottles, gel jars and many others. These are manufactured from high quality polypropylene, pet and many other allied materials. Entire range is made under the strict supervision of experienced quality controllers and following international industrial standard. These can be availed in various shape options. Besides, these are extensively used for the packaging of different products.

Cream Jars

Cream jars are available in various shapes and range as per the specifications. These are manufactured using polypropylene and by implementing EBM techniques. Entire range of these cream jars is properly quality checked on various parameters under the firm direction of experienced quality controllers. These find their wide applications for the packaging of various creams, herbal products, gel and many other allied products.
